1. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is directed to a method for controlling a partitioned audio system in an automobile. Huemann et al. and Nicholson et al. both show automotive audio control systems with dual play modes but differs from the method of claim 1 in that neither teaches or fairly suggests a transition phase whereby an output level of the front speakers increases while the output level of the rear speakers decreases when the prioritized audio system is switched from the first mode of operation to the second mode of operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
